

# Basic Surface Area and Volume of

## Spheres Notes

Surface Area:

Volume:

Find the volume and surface area of the sphere. Round to the nearest tenth.

**Example 1:**

**Example 2:**  
**C = 24 inches**

Find the volume and surface area of the solid or composite below.  
Round to the nearest tenth.

**Example 3:**

**Example 4:**

## 12.6 Spheres

Radius-

Chord-

Diameter-

Tangent-

Great circle-

Surface area =

**Ex 1** A ball has a circumference of 24 in. Find the surface area.

**Ex2** Find the surface area of a hemisphere with a radius of 3.8 in.
