

In Class Practice

Line Segments and Angles:

The Basics

Directions: Illustrate the following.

1. $\overline{AB} \cong \overline{XY}$

2. $\angle XYZ \cong \angle ABC$

3. Point P is the midpoint of \overline{MN}

4. Line m is a segment bisector of \overline{AB}

5. \overrightarrow{RS} is an angle bisector of $\angle TRV$

6. Line l is a \perp bisector of \overline{HI}

7. $\angle 1$ and $\angle 2$ are linear pairs

8. \overrightarrow{AB} and \overrightarrow{AC} are opposite rays

9. $\angle LMN$ is a right angle

10. $\angle 2$ is an obtuse angle
